

Who

SHOULD ATTEND THIS FREE EVENT?

Everyone with an interest in keeping abreast of the current innovations in vacuum related equipment is welcome and encouraged to attend. The 2000 Vacuum Equipment Exhibit will be an excellent opportunity to see products and services offered by the more than 30 participating companies.

THERE IS NO FEE TO ATTEND THE VENDOR SHOW, BUT REGISTRATION IS REQUIRED.

You will save time at the Show if you preregister using the form on the other side of this brochure. However, because the exhibit is part of the 36th Annual AVS/NM Symposium, *EMERGING TECHNOLOGIES 2000*, which includes technical sessions and a program of Short Courses, if you register for either the Symposium or a short course, you are automatically registered for the Vendor Show.

For more information about either the Symposium or the Short Courses, check the appropriate boxes on the registration form. There are fees for attending either of these programs.

What

Exhibit Topic Areas

The vendor show will be relevant to engineers, technicians, scientists, purchasing professionals and others in the following fields:

| | |
|--------------------------|-------------------|
| Electronic Materials | Plasma Processing |
| Vacuum Technology | Thin Films |
| Manufacturing Technology | Surface Science |
